## **DETAILED ACTION**

### ***Election/Restriction***

**1. Restriction to one of the following inventions is required under 35 U.S.C. 121:**

- I. Claims 1-12 are, drawn to a method of treating brain edema using melatonin, classified in class 514, subclass 359 plus.**
- II. Claims 13 and 15 are, drawn to pharmaceutical or food compositions, classified in class 424, subclass 435.**

**2. The inventions are distinct, each from the other because of the following reasons:**

**Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used for the treatment of melatonin treatable diseases such as neoplastic disease and psychological conditions; or the process can be practiced by other anti-edema drugs or steroids.**

**3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.**

Art Unit: :1615

**4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.**

**5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).**
